### Research Experience

<b>Population Research Assistant for Norris Cancer Research Center</b>	2012-2013
--	-----------

Conducted population research on Biospecimen collection and banking in Pacific Islander communities

**SAATH / Charles Drew University Health Seeking Study** 2013

Conducted research on quality of cancer treatment among immigrant South Asian patients in California. Worked on recruiting, advertising, transcribing interviews of foreign patients and consolidating data collected.

**Hacia Laboratory, Keck School of Medicine** 2014-2016

Conducted research on identifying the genetic and molecular basis for a group of multi-systemic neurological disorders caused by impaired peroxisome function. Worked on drug discovery and therapy trials for X-linked adrenoleukodystrophy.

**AIDS Health Care Foundations, Los Angeles** 2015-2016

Conducted original research on the protective factors against syphilis transmission among Hispanic individuals in California. Study was accepted for presentation at the 67<sup>th</sup> Annual Society for Public Health Educators Conference.

**Wei Research Team, UCSF Department of Dermatology** 2016-present

I am currently conducting research on the concordance rates between diagnosing melanoma through teledermatology and in clinic consultations. The aim of my research is to determine if teledermatology can be an effective tool in diagnosing melanoma in low resource populations.

**Memorial Sloan Kettering Cancer Center, Research Fellow** 2017-present

I am currently conducting research at Memorial Sloan Kettering in the Mohs Surgery and Dermatology department on patient outcomes with different skin cancer treatments. The aim of my research is to determine whether functional status can be used as a tool to guide surgeons in determining the best treatment for non-melanoma skin cancers in patients over the age of 85.
